Subject: RE: Former Pechiney Cast Plate, Inc Facility - Number and location of soil samples for Phase I

Hello Daniel and Linda:

Thank you for the update on the Pechiney site. I truly appreciate it.

Linda, I wanted to ask if it would be possible to provide updates on the Pechiney site related to PCBs via email messages rather than via the hard copy ground water monitoring or site update reports that you routinely send to DTSC. We do not have much space in our Records' room. If PCBs are detected in ground water, the EPA definitely would like to know about that issue. We appreciate receiving the reports that you send to DTSC. Because of the reason that I explained here, we prefer not to receive those reports in hard copy; and that updates on the PCB work be provided electronically via email message, if possible.

Thank you for your courtesies. I look forward to your reply.

Sincerely,
Carmen
